

Project Initialization and Planning Phase

Date	26 June 2026
Team ID	XXXXXX
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am	I'm trying to	But	Because	Which makes me feel
A professional attending networking events and conferences	Start meaningful conversations and build valuable connections	I struggle to think of relevant and personalized conversation starters	I don't know much about the person, their background or shared interests	Nervous and less confident during networking opportunities

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student studying difficult subjects through an online platform	Understand concepts clearly and stay motivated while learning	I often get stuck and don't know how to explain what I'm struggling with	There is no teacher or tutor available at that moment to sense my confusion	Frustrated and confused during study sessions
PS-2	A student who hesitates to ask questions in class or online forums	Get help with topics I find hard to understand	I avoid reaching out because I feel embarrassed about not understanding	Traditional e-learning platforms don't recognize how I am feeling	Bored and disengaged from the learning material
PS-3	A student preparing for exams under time pressure	Build confidence and retain concepts quickly	I can't tell if my confusion is normal or if I need extra support	There is no way for the system to detect my emotional state while studying	Anxious and unsure about my learning progress
