Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "Why doesn't this concept make sense no matter how many times I read it?" • "I wish something could tell me why I feel stuck right now." • "I need study tips that actually match how I'm feeling."	THINKS • "Is it just me, or is this topic genuinely confusing?" • "I hope I can get help without feeling judged for not understanding." • "Will this app actually understand what I'm going through?"
PERSONA NAME Ravi Kumar <i>(Engineering Student / Online Learner)</i>	
DOES • Re-reads the same paragraph several times when confused. • Switches between tabs and videos looking for a simpler explanation. • Skips difficult topics and returns to them later, often frustrated.	FEELS • Frustrated when a concept doesn't click despite repeated effort. • Anxious about falling behind before exams. • Relieved and motivated when given a clear, personalized explanation.
